

The Wilson Lab Theme Song

By Ray Wall 6/6/05

The Wilson Lab Synchrontron has flying electrons
With Quarks and Mesons and big Leptons
Cornell smashes the atom!

Matter and Anti-matter created in the Accelerator
Spin at light speed in the Synchrontron
We crash them together inside the Detector!

That's where new particles are born
Inside the Detector
We analyze the collisions
That's particle physics

Particle Storage Ring runs round half a mile
Our magnets focus the beams
With vacuum pumps and super-cooled extremes
See what the universe means!

Our technology's totally awesome
Only 10 Synchrontrons in the world
When you visit you're gonna say:

Go big Synchrontron
Go big Synchrontron
Go big Synchrontron
Go big Synchrontron
